

Spartanburg Community College is requesting quotes for an Economic Modeling Project. Currently the College uses Lightcast Analyst. Lightcast Analyst is used to help the College determine the occupational need for new academic programs. Lightcast data includes occupational outlooks that can be disaggregated by location and job titles, industry outlooks, highly sought skills from job posting analytics, top employers, demographic breakdown of existing workforce, regional academic programs producing graduates, and more. This information is necessary to make data-informed decisions about the need and design of new academic programs at SCC, a key part of SCC's newest Strategic Plan.

All quotes are due no later than 2:00 pm March 28, 2024

Quotes are to be emailed to Tami Steed steedt@sccsc.edu
